Index	761

EXPLANATORY NOTES

1. **Source of Data.** Import statistics are compiled from information appearing on customs entries and invoices.

2. **Coverage.** During the period covered by this volume, import statistics included goods cleared by Customs for consumption immediately on arrival in Canada, plus goods cleared for consumption out of customs warehouses. They did not include goods entered into customs warehouses. The technical phrase "Imports entered for consumption", which was often used to describe these statistics, did not imply that all imports would necessarily be consumed within Canada, but only that they were free to be so consumed without further customs formalities.

The import totals published in this volume exclude the following commodity movements (although some of these are recorded in the new group of "Special Transactions—Non-Trade" which is further described in the special note on "Changes in Coverage of Canadian Trade Statistics"):

gold and gold products where the value of the gold content is 80% or more of the total value (except for a small amount of gold scrap in the form of jewellers' sweepings which is included in class 6084); current coin; settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign armed forces or diplomats stationed in Canada (or brought back by Canadian armed forces or diplomats returning from postings outside Canada); temporary imports for exhibition or competition (and film imported for exhibition or processing or returned after exhibition or processing abroad); ships of British construction and registry imported for use in Canada, and ships and aircraft purchased for use as international carriers but not used to carry goods between points in Canada; bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad; generally, all temporary imports and goods merely moving in transit through Canadian territory.

3. **Countries Credited.** Imports are credited to the country from which the goods were first directed to Canada, except for goods of Central or South American origin consigned to Canada from the United States which are credited to the country of origin.

4. **Quantities.** Units of weight or volume, where shown in this report, relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment except in special cases otherwise defined in the Customs Tariff. Units of number refer to the number of complete or substantially complete units imported, excluding parts. For any commodity class where the recorded value includes both complete units and parts of these units, the average value per complete unit cannot be calculated. The various units of quantity used in Canadian import statistics are listed below under "Abbreviations and Units of Quantity".

5. **Values.** The value of goods imported is usually the value as determined for customs duty. In most cases, this corresponds to the value shown on the invoice accompanying the goods, converted to Canadian dollars at authorized exchange rates (usually the commercial rate prevailing on the date on which the goods were actually despatched to Canada), and excluding such charges as freight, insurance, handling and taxes. In effect, this system usually results in values f.o.b. point of shipment in the country of export. Effective with statistics for January, 1959, the statistical value of imports on which dumping duty has been collected is considered to be the value of the goods as declared by the importer (i.e. the value for duty less the amount of dumping duty). This change in procedure is to conform with the principle that trade statistics should show, whenever possible, the actual amount paid for imports. Previously the statistical value of such imports was considered to be the value for duty. Subsequent to 1960, it was discovered that importers were occasionally reporting c.i.f. values for free goods and goods subject to specific rates of duty. The value of imports of raw cotton and crude petroleum was revised retroactive to January, 1960, to restore these to an f.o.b. basis, and it is the revised values for these commodities which appear in this report.

NOTES EXPLICATIVES

1. **Source des données.** La statistique des importations est tirée de renseignements qui paraissent dans les déclarations et les factures de douane.

2. **Champ d'application.** Durant la période observée dans le présent volume, la statistique des importations comprend les marchandises destinées à la consommation et dédouanées dès leur arrivée au pays, plus les marchandises dédouanées des entrepôts de la douane. Elle ne comprend pas les marchandises placées en entrepôt de la douane. L'expression technique "importations pour la consommation", souvent employée pour décrire cette statistique, ne veut pas dire que toutes les marchandises importées seront de fait consommées au Canada, mais seulement que ces marchandises peuvent être consommées au pays sans autres formalités douanières.

Les chiffres des importations contenus dans le présent volume ne comprennent pas le mouvement de marchandises suivantes (bien que certaines soient inscrites dans le nouveau groupe "Transactions spéciales—hors-commerce", décrit plus loin dans une note spéciale intitulée "Modifications apportées à la couverture statistique du commerce canadien"):

or et articles en or ou la valeur de la teneur en or est de moins de 80 p. 100 de la valeur totale (sauf une petite quantité de déchets sous forme de balayures de bijoutiers qui s'inscrit dans la classe 6084); monnaie courante; effets des immigrants; dons et cadeaux particuliers; achats en franchise des touristes; marchandises importées par les forces armées où les diplomates étrangers en service au Canada (ou rapportées par les forces armées ou les diplomates canadiens rentrant de l'étranger); importations temporaires pour expositions ou concours (et films importés pour présentation ou développement ou retournés à l'étranger après présentation ou développement); navires de construction et d'immatriculation britannique importés pour usage au Canada, et navires et aéronefs achetés pour usage comme transporteurs internationaux mais ne servant pas au transport des marchandises entre en droits situés au Canada; fournitures d'ensoutage et approvisionnements de bord achetés à l'étranger par des navires ou aéronefs canadiens; en général, toutes les importations temporaires et les marchandises ne faisant que passer par le territoire canadien.

3. **Pays crédité.** Les importations sont attribuées au pays d'où les marchandises sont parties d'abord à destination du Canada, sauf les marchandises provenant de l'Amérique centrale et du Sud expédiées au Canada des États-Unis, qui sont attribuées à leur pays d'origine.

4. **Quantités.** Le poids ou volume unitaire, là où il est donné dans le présent rapport, est le poids ou volume des marchandises sans celui de l'emballage sauf dans certains cas autrement définis dans le Tarif des douanes. Le nombre unitaire désigne le nombre d'articles complets ou à peu près complets importés, sans leurs pièces. Dans toutes classes de marchandises où la valeur déclarée comprend les unités complètes et leurs pièces, il est impossible de calculer la valeur moyenne par unité complète. Les diverses unités de quantité employées dans la statistique des importations canadiennes sont énumérées sous la rubrique "Abréviations et unités de quantités".

5. **Valeur.** La valeur des marchandises importées est ordinairement la valeur en douane qui, dans la plupart des cas, correspond à la valeur indiquée sur les factures qui accompagnent les marchandises, convertie en dollars canadiens au taux d'échange autorisé (habituellement le taux commercial à la date où les marchandises ont été effectivement expédiées au Canada), et à l'exclusion des frais de transports, d'assurances, de manutention et des taxes. De fait, ce système donne la valeur f.à b. au point d'expédition du pays exportateur. À compter de la statistique de janvier 1959, la valeur statistique des importations sur lesquelles a été prélevé un droit de dumping est tenue pour la valeur des marchandises déclarée par l'importateur (valeur en douane moins le droit de dumping). Cette modification est en conformité du principe voulant que la statistique du commerce révèle, là où c'est possible, le montant réel payé pour les importations. Autrefois la valeur statistique de ces importations était la valeur en douane. Depuis 1960, on a découvert qu'occasionnellement les importateurs déclaraient c.a.f. la valeur des marchandises en franchise et celles qui étaient sujettes à des taux de douane déterminés. La valeur des importations de coton brut et de pétrole brut est révisée à compter de janvier 1960 et ramenée à une base f.à b. et c'est la valeur révisée de ces produits qui paraît dans le présent rapport.

6. Abbreviations and Units of Quantity

Bbl.....	Volume in barrels, for petroleum, 35 Imperial gallons
Broad woven	More than 12 inches in width
B. Un	Billion international units
Bu.	Volume in bushels, for barley, 48 lbs. for buckwheat, 48 lbs. for Indian corn (maize), 56 lbs. for oats, 34 lbs. for rye, 56 lbs. for wheat, 60 lbs.
Canned.....	Preserved solely by being shut off from air
Carat	Weight in carats
Cord	Volume in cords
Cwt.	Weight in hundredweights of 100 lbs. each
Cwt. N.	For canned foods, weight of contents of cans in hundredweights of 100 lbs. each, the weight of all containers and packing being excluded
Doz.	Number in dozens
Dz. Pr.	Number of pairs in dozens
Ft.	Length in linear feet
Gal.	Volume in Imperial gallons
Hardwood	Wood from broad-leaved trees
Kg.	Weight in kilograms (1 Kg. = 2.2046 lb.)
Lb.	Weight in pounds
Lb. N.	For canned foods, weight of contents of cans in pounds, the weight of all containers and pack- ing being excluded
M.	Number in thousands
M.B. F.	Volume in thousand board feet
M. C. F.	Volume in thousand cubic feet
M. Kw. H.	Thousand kilowatt hours
Narrow Woven	Not more than 12 inches in width
N. E. S.	Not elsewhere specified
No.	Number
Oz.	Weight in ounces
P. Gal.	Volume of alcoholic content in terms of gallons of the strength of proof
Pair	Number in pairs
Rf. Sq.	Area in roofing squares
Roll	Number of single rolls of 7½ yards
Softwood	Wood from coniferous trees
Sq. Ft.	Area in square feet
SF¼	Volume in square feet of ¼" thickness, other thicknesses to be converted to the equivalent of ¼" thickness (e.g. 10,000 sq. ft. of ¼" ply- wood = 5,000 sq. ft. of ¼" equivalent)
Ton.....	Weight in short tons of 2,000 lbs. each
Tr. Oz.	Weight in troy ounces
\$	No quantity recorded

6. Abréviations et unités de quantité

Volume en barils, pour le pétrole, 35 gallons impériaux
Plus de 12 pouces de largeur
Milliards d'unités internationales
Volume en boisseaux, pour l'orge, 48 livres pour le sarrasin, 48 livres pour le maïs, 56 livres pour l'avoine, 34 livres pour le seigle, 56 livres pour le blé, 60 livres
Conservé uniquement en étant hermétiquement clos
Poids en carats
Volume en cordes
Poids de 100 livres
Pour les aliments en conserve, poids de 100 livres du contenu des boîtes, le poids de tous les réci- pients et de l'emballage étant exclus
Nombre de douzaines
Nombre de douzaines de paires
Longueur en pieds linéaires
Volume en gallons impériaux
Bois des arbres feuillus
Poids en kilogrammes (1 Kg. = 2.2046 liv.)
Poids en livres
Pour les aliments en conserve, poids du contenu des boîtes en livres, le poids de tous les réci- pients et de l'emballage étant exclus
Nombre en milliers
Volume en milliers de pieds planche
Volume en milliers de pieds cubes
Milliers de kilowatts-heure
De pas plus de 12 pouces de largeur
Non compris ailleurs
Nombre
Poids en onces
Volume du contenu alcoolisé en gallons de preuve
Nombre de paires
Superficie en carrés à toiture
Nombre de rouleaux uniques de 7½ verges
Bois des conifères
Superficie en pieds carrés
Volume en pieds carrés de ¼" d'épaisseur, les autres épaisseurs devant être converties à cette épaisseur (e.g. 10,000 pi. c. de contreplaqué de ¼" = 5,000 pi. c. de ¼")
Poids en tonnes courtes de 2,000 livres chacune
Poids en onces troy
Aucune quantité indiquée

CHANGES IN COVERAGE OF CANADIAN TRADE STATISTICS

Prior to 1960, Canadian export and import statistics differed in their treatment of such special transactions as tourist purchases and shipments of goods to Canadian diplomats abroad or to foreign diplomats in Canada. In addition, both records included such non-commercial transactions as movements of settlers' effects and private donations and gifts. As a result, there were sizable differences between trade balances calculated from unadjusted export and import totals, and those calculated from data adjusted to exclude special and non-commercial transactions.

In 1960 a new category was established in both export and import records under the title "Special Transactions - Non-trade". This category includes various commodity movements which either have no international financial implications or, for various reasons, are better considered separately from merchandise trade in economic analysis. The value of these transactions is now excluded entirely from published totals of Canadian merchandise trade, although statistics for the classes included in this category are still compiled and published.

As a result of these changes, export and import totals will now have substantially the same coverage. They will therefore provide a much better picture of the merchandise trade component of the balance of payments. There are still differences in timing between the trade and balance of payments records, and some commodity movements (such as shipments of goods financed under the Colombo plan) are still included in merchandise trade totals although treated otherwise in balance of payments accounting. These differences are much less significant than in the past.

The former treatment of the classes of transaction included in "Special Transactions - Non-trade" was as follows:

1960 Class	Description	Former treatment	
		Exports	Imports
9905-9965	Gold and current coin.....	excluded	excluded
9980	Movements of goods for Canadian armed forces or diplomats abroad, or foreign armed forces or diplomats in Canada	excluded	largely included
9982	Settlers' effects	included	included
9984	Private donations and gifts	included	included
9986	Tourist purchases	partly included	included
9988	Movements of goods for exhibition or competition....	excluded	excluded
9990-9992	Photographic film moving for exhibition or processing without sale	partly included	partly included

MODIFICATIONS APPORTÉES À LA COUVERTURE STATISTIQUE DU COMMERCE CANADIEN

Avant 1960, la statistique des exportations et des importations traitait différemment les transactions spéciales telles que les achats des touristes et les expéditions de marchandises destinées aux diplomates du Canada à l'étranger et aux diplomates étrangers au Canada. En outre, la statistique des exportations et des importations comprenait des transactions non commerciales comme les mouvements d'effets des immigrants et les dons et cadeaux privés. Par conséquent, il y a eu des différences importantes entre les balances du commerce établies d'après les totaux non rectifiés des exportations et des importations et celles établies d'après les données rectifiées en excluant les transactions spéciales et non commerciales.

Depuis 1960, la statistique des exportations et des importations comprend une nouvelle catégorie sous la rubrique "Transactions spéciales - hors-commerce". Cette catégorie renferme divers mouvements de marchandises qui n'ont aucune implication financière internationale, ou qu'il vaut mieux, pour diverses raisons, séparer du commerce des marchandises pour fin d'analyse économique. La valeur de ces transactions est maintenant tout à fait exclue des totaux publiés du commerce canadien de marchandises, bien que la statistique des classes comprises dans cette catégorie soit encore établie et publiée.

Par suite de ces modifications, les totaux des exportations et des importations auront dorénavant à peu près la même portée. Ils renseigneront donc de façon plus précise au sujet de l'élément "commerce des marchandises" dans la balance des paiements. Il existe encore des différences entre l'actualité des données du commerce et celle de la balance des paiements et de plus, certains mouvements de marchandises (comme les expéditions de biens financées en vertu du Plan de Colombo) sont encore inclus dans les totaux du commerce des marchandises, bien qu'ils soient traités autrement pour les besoins de la comparabilité de la balance des paiements. Ces différences sont beaucoup moins importantes que dans le passé.

Voici le traitement antérieur des classes de transactions maintenant comprises dans la catégorie "Transactions spéciales - non commerciales":

1960 Classe	Description	Traitement antérieur	
		Exportations	Importations
9905-9965	Or et monnaie courante	exclus	exclus
9980	Mouvements de marchandises destinées aux forces armées ou aux diplomates du Canada à l'étranger, ou aux forces armées ou aux diplomates étrangers au Canada	exclus	en grande partie inclus
9982	Effets des immigrants	inclus	inclus
9984	Dons et cadeaux particuliers	inclus	inclus
9986	Achats des touristes	partiellement inclus	inclus
9988	Mouvements de marchandises à destination des expositions et des concours	exclus	exclus
9990-9992	Mouvements de films photographiques en vue d'expositions ou de développement sans qu'il y ait vente	partiellement inclus	partiellement inclus

NEW COUNTRY CLASSIFICATION FOR EXTERNAL TRADE STATISTICS

A new classification of countries was introduced for export and import statistics as of January 1, 1960. The new classification is basically geographical: it divides the world into nine geographic regions, and within each region lists one sub-group of Commonwealth countries and a second of other countries. Statistics for earlier years presented in this report have been adjusted to conform with the new classification as far as possible.

The regions used in the new classification, and the order in which they are listed, are as follows:

Western Europe
Eastern Europe
Middle East
Other Africa
Other Asia
Oceania
South America
Central America and Antilles
North America

The arrangement of the regions was determined by the convenience of listing the United Kingdom first when presenting statistics of commodities by countries, and the United States last, directly above the commodity totals. This arrangement of country detail is traditional in Canadian trade reports, and has proven useful in permitting ready reference to details of trade with Canada's two leading trading partners.

The countries included in each region are shown on the following pages. In Canadian statistics the territory of any country is considered to be the geographic area of the country unless otherwise stated; that is, it includes both the customs area of the country and also any free areas in which customs control may not be exercised. Countries with which Canada's trade is small are grouped with contiguous or related areas.

The adoption of a new country classification facilitated extensive changes in the country names and the extent of country detail shown in Canadian trade statistics. The drafting of these changes was guided by two criteria, which will also be used to guide future revisions to the classification:

1. Total trade between Canada and each country specified should exceed \$100,000 per year.
2. Available documentation must be adequate to compile accurate statistics of trade between Canada and each country specified.

The new classification also incorporates a few changes in country designation without any change in territorial coverage as well as a number of changes in country coverage, including the deletion of some countries and the addition of others. The countries affected by these changes are asterisked in the classification of countries.

NOUVELLE CLASSIFICATION DES PAYS POUR LA STATISTIQUE DU COMMERCE EXTÉRIEUR

Le 1er janvier 1960, on a établi une nouvelle classification des pays pour la statistique des exportations et des importations. La nouvelle classification est fondamentalement d'ordre géographique: elle divise le monde en neuf régions géographiques et à l'intérieur de chaque région, groupe les pays du Commonwealth en un sous-groupe et les autres pays en un second sous-groupe. La statistique antérieure qui paraît dans le présent rapport a été rectifiée autant que possible conformément à la nouvelle classification.

Voici les régions utilisées dans la nouvelle classification et en outre, l'ordre dans lequel elles sont énumérées:

Europe occidentale
Europe orientale
Moyen-Orient
Autres pays d'Afrique
Autres pays d'Asie
Océanie
Amérique du Sud
Amérique centrale et Antilles
Amérique du Nord

L'ordre de l'énumération des régions a été établi de façon à indiquer d'abord le Royaume-Uni dans la présentation de la statistique des marchandises selon les pays, et, les États-Unis en dernier, directement au-dessus des totaux de marchandises. Cette disposition des pays est traditionnelle dans les rapports du commerce du Canada et s'est révélée utile, car elle permet de se référer rapidement aux données du commerce du Canada avec ses deux principaux partenaires commerciaux.

Les pays compris dans chaque région sont énumérés aux pages suivantes. Dans la statistique du Canada, on estime que le territoire de n'importe quel pays est la région géographique du pays à moins d'indication contraire: c'est-à-dire que la région comprend et la région douanière du pays et toutes les régions libres où les règlements douaniers ne peuvent être appliqués. Les pays avec lesquels le commerce canadien est peu important sont groupés avec les régions avoisinantes ou similaires.

L'adoption d'une nouvelle classification des pays a facilité les modifications importantes apportées aux noms des pays et à la portée des données présentées dans la statistique du commerce du Canada. Ces changements ont été établis suivant deux critères qui seront aussi utilisés dans les prochaines révisions de la classification:

1. La valeur du commerce total entre le Canada et chaque pays énuméré doit atteindre plus de \$100,000 par année.
2. La documentation disponible doit être appropriée en vue de permettre d'établir la statistique exacte du commerce entre le Canada et chaque pays mentionné.

La nouvelle classification apporte aussi quelques modifications aux noms des pays, sans en changer la couverture territoriale, ainsi que certains changements dans la couverture des pays, y compris l'addition de certains pays et le retrait de certains autres. Les pays visés par ces changements sont précédés d'un astérisque.

CLASSIFICATION OF COUNTRIES

Code	Area Group and Country	Coverage
Western Europe:		
Commonwealth Countries:		
1	United Kingdom	Includes trade with the Channel islands.
15	Gibraltar	
*19	Malta and Gozo	From Jan. 1, 1960, excludes trade with Cyprus.
Other Countries:		
43	Austria	Excludes trade with the exclaves of Jungholz and Mittelberg (included with Germany, Federal Republic).
44	Belgium and Luxembourg	
49	Denmark	Includes trade with the Faeroe islands.
53	Finland	
54	France	Includes trade with Andorra and Monaco. From Jan. 1, 1959, excludes trade with the Saar (see Germany, Federal Republic).
55	Germany, Federal Republic	From Jan. 1, 1959, includes trade with the Saar (formerly included with France). Includes trade with the Austrian exclaves of Jungholz and Mittelberg. Excludes trade with the exclaves of Busingen and some districts of Baden (included with Switzerland).
59	Greece	
63	Iceland	
64	Ireland	
67	Italy	Includes trade with San Marino and Vatican City. Excludes trade with the exclave of Campione (included with Switzerland).
73	Netherlands	
76	Norway	Includes trade with Svalbard and Jan Mayen islands.
*78	Portugal	From Jan. 1, 1960, includes trade with the Azores and Madeira islands (classified separately until Jan. 1, 1960).
82	Spain	Excludes trade with the Canary islands, Ceuta and Melilla (see Spanish Africa).
85	Sweden	
86	Switzerland	Includes trade with Liechtenstein, with the German exclaves of Busingen and some districts of Baden, and with the Italian exclave of Campione.
Eastern Europe:		
242	Albania	
245	Bulgaria	
246	Czechoslovakia	
258	Germany, East	
262	Hungary	
277	Poland	
279	Roumania	
*287	Union of Soviet Socialist Republics	From Jan. 1, 1960, includes trade with Estonia, Latvia and Lithuania (formerly classified separately).
288	Yugoslavia	
Middle East:
